RE: Rogers Communications Inc. Proposed 45-meter-tall Telecommunications facility

Location: Block 1, Plan 2266JK

Site Code: W5618 – TOWNSHIP ROAD 255

Evolve: 25227

We are writing to inform you of the status of the telecommunications facility previously proposed on the lands noted above. After completing the public consultation process, the local community had various concerns with the proposed location. This triggered a thorough internal review process of the proposal by Rogers Communications Inc. ("Rogers")

The conclusion of this review sees Rogers rescinding the proposed telecommunications facility proposal, at this location.

What does this mean? Although Rogers will still need to fill the gaps in their coverage for the area, we will do that by finding a more suitable location for such a facility. This will be accomplished by adhering to the permitted and discretionary uses of any parcel deemed to be a candidate, and through discussions with Rocky View County to ensure we are aligning with the policies and procedures within your community.

The Public Consultation process is a key step in the process, and we would like to thank you for your feedback!

Sincerely,

Evolve Surface Strategies Inc

on behalf of **Rogers Communications Inc.**
